

Incident Reports: Industrial Visit to Goa

Incident One: AC Malfunction in the Bus

- **Description:** The air conditioning system in the bus stopped working shortly after departure, causing discomfort to the participants.
- **Action Taken:** Multiple attempts were made to fix the AC during the journey. The issue was resolved on May 2nd; it was found to be due to blockage in the AC ducts, which was subsequently cleared.

Incident Two: Minor Injury to a Student

- **Description:** A steel bottle accidentally fell and hit a student on the nose, resulting in slight bleeding.
- **Immediate Response:** First aid was administered promptly by the accompanying faculty, stopping the bleeding and managing the pain.
- **Further Action:** The student was taken to a nearby hospital for a thorough check-up to rule out any serious injury. The medical evaluation confirmed there was no fracture, just minor swelling. Appropriate medication was prescribed to manage the swelling and discomfort.
